Tifosi Optics Dolomite

From Tifosi Optics Sport fashion line, the Dolomite seamlessly transitions from bike to casual wear. The Dolomite features a Grilamid frame and three polycarbonate lenses in clear, all conditions red and smoke tints. The nose and ear pieces are made from hydrophilic rubber which increases it's grip when wet. Enhanced visual system lenses provide the most advanced optics available for sport eyewear by merging progressive lens technology with an advanced decentering process, the result is phenomenal straight ahead optics with a 20 percent wider field of distortion free vision than standard 8 base lenses. Also available with Back Country Orange Fototec variable tint technology lens. RRP from \$109.90

Tifosi Forza FC

A product with a small price tag, but carrying solid quality. The Forza FC has a virtually indestructible Grilamid frame with hydrophilic rubber temples and nose pieces, a optically decentered polycarbonate lens for impact resistance and great optical clarity, and is a featherweight at only 20 grams. All Tifosi Optics polycarbonate lenses block 100% of UVA and UVB radiation. Also available with High Speed Red or Light Night Clear Fototec variable tint technology lens. RRP from \$49.90
