

P PROFILE: EYEWEAR

GIROfilter

The "half entrapped" frame style helps keep weight low and is Super Fit Engineered for helmet compatibility. Proprietary Pop Top technology allows you to change lenses without stress or fingerprints on the lens. Exclusive ZEISS Certified lenses provides best-in-class optics and feature a Dura Clean coating that resists scratches and damage from road debris and grit. **PRICE:** \$199. **MORE STUFF:** giro.com.

GIROhavik

Sculptural frame is Super Fit Engineered for helmet compatibility, and features Wind Tunnel(TM) vented temples that help to circulate air behind the lens to help prevent fogging. Exclusive ZEISS Certified lens provides best-in-class optics and features a Dura Clean coating that resists scratches and damage from road debris and grit. **PRICES:** \$139-\$199 [depending on lens options]. **MORE STUFF:** giro.com.

RUDY PROJECTkarboneye

KarbonEye is made with pure carbon fiber, Kyniteum, and ImpactX lens material. The KarbonEye is a single-piece lens-shield that offers an unobstructed range-of-vision at any angle and uses the ImpactX Photochromic shield, which adjusts tint depending upon UV intensity [tint range dependant on lens selection]. The KarbonEye also sports full-on Carbon temples that include Rudy's adjustable tips for that custom fit. **PRICES:** \$325-\$380. **MORE STUFF:** e-rudy.com.

RUDY PROJECTnoyz

The Noyz is comfortable and lightweight, designed with techno-geometric mathematics for exceptional performance. This wraparound sunglass incorporates all of Rudy Project's core features for protection, optical ratings and comfort: ultra-light Grilamid chassis, QuickChange, interchangeable lenses, co-injected ErgoV fully adjustable nosepiece, and 360° adjustable temple tips in hypoallergenic Megol. **PRICES:** \$175-\$255. **MORE STUFF:** e-rudy.com.

SPECIALIZEDarc 2

Arc II models are available in Adapalite photochromic versions or non-shifting NXT. Uses a stainless steel, non-folding frame and Adapalite lens [road formula] adjusts to existing light conditions. The NXT lens material is more shatterproof and lightweight than polycarbonate. The front lens vents help to eliminate fogging, while the frontal bridge provides rigidity and sweat management. Uses a molded Megol nosepiece and covered ear tabs. Available in two sizes for a variety of riders: Arc II small is approx. 10mm smaller side-to-side and 5mm shorter top-to-bottom than Arc II regular. Comes with hard case. **PRICE:** \$160. **MORE STUFF:** specialized.com.

SPECIALIZEDmiura

Available in Adapalite photochromic or non-shifting dark state NXT. Specialized Adapalite lens [road formula] adjusts to existing light conditions. Filters in the road formula enhance reds for improved safety. NXT lens material is superior in its light weight and shatterproof qualities. Uses molded Grilamid frames. Adjustable, dual density ear pieces. Adapalite model includes molded hard case. Replacement Adapalite and NXT lenses sold separately. **PRICES:** \$100-\$145. **MORE STUFF:** specialized.com

KAENONkore

The Kore is a very light weight frame which is available with Kaenon's Polarized SR-91 lens material in 8.25 base curve for maximum wrap and rake in 3 different ergonomically-designed lens shapes/sizes: large, medium and small - guaranteeing optimum visual performance and maximum protection from the wind, water, sand, dirt, and other natural elements you may encounter. The Kore's shape complements different head shapes and facial features. Kore utilizes Glare 86 Polarizing technology and proprietary Light Transmission Control (LTC) technology comes in a variety of dark and light lens tints, copper, gray and yellow. Kore comes with lightweight sport case. **PRICE:** \$209. **MORE STUFF:** kaenon.com

KAENONhard kore

The Hard Kore utilizes Kaenon's Polarized SR-91 lens material. The result of innovative materials and a "function first" focus, hard Kore is the ultimate performance product for today's athlete, whether it is chasing the peloton or everyday riding. This fresh design is lightweight, incredibly durable, and intuitively integrates with the natural form of the wearer's head shape while accommodating different facial features. Kaenon's polarizing technology and proprietary Light Transmission Control (LTC) technology comes in a variety of dark and light lens tints, copper, gray and yellow. Hard Kore comes with large hard case and micro fiber bag. **PRICE:** \$209. **MORE STUFF:** kaenon.com.

ROOLYipola

Rooly has gone the extra yard to offer the best Polarized Lens Technology in the industry to date, IPCLA. Rooly-IPCLA lenses have Injected Polarization which will eliminate deterioration and distortion of your polarized lenses. Other brands use a dual lens sandwich and a single polarize film strip on a lens, which are inferior and dated technologies. **PRICE:** \$169. **MORE STUFF:** rooly.com

ROOLYtony cruz signature

Tony Cruz's signature sunglass will be featured in our Fashion Performance category of sunglasses named Prospect. The Tony Cruz signature sunglasses will stand alone with a Polished White logo and temple arm badge on a Glossy Black frame, our Silver Ice lens with our Resistance Coat, and Tony's signature etched in the corner. **PRICE:** \$129. **MORE STUFF:** rooly.com
